Not sure that Tom passed these on to you
But it is a small **Technical** School on the outskirts of Los Palos (on the road to Fuiloro)
It was a private school but is now runs as a Government school and it appears to have a good reputation as a well-run organisation
Brother Adriano will carry out the Feasibility and Consultation with the school to ensure, its what they want and are prepared to work for and maintain the infrastructure to the standards set by the other 24 schools and orphanage that already have installed the infrastructure, and some of these are now 7 years old and none have failed

Look forward to your reply and hopefully joining the project

Regards

Max Bird
